Career Objective:

To apply my knowledge, perception, and innovation to build up a long-term successful career in dynamic & professional environment through my aptitude, hard work, dedication & determination.

Educational Qualifications:

Bachelor Degree/Examination	Major	Institution	Year	CGPA/GPA
B.Sc.(Engg.)	Computer Science and Engineering	Leading University, Sylhet	2017	3.13 Out of 4.0
H.S.C	Science	Jalalabad Cantonment Public School and College, Sylhet	2012	4.80 Out of 5.0
S.S.C	Science	Sylhet Govt. Pilot High School, Sylhet	2010	5.0 Out of 5.0

Academic Projects:

- Machine Learning Approach (MLA) for URL Filtering - (Running)
(Language/ Platform : Java, Data Mining Tool(WEKA), Machine

Learning Language, Microsoft Excel 2010)

The main purpose of this project is to develop a more secure and featured URL filtering engine based on machine learning approach. In current there are many URL filters are present named as ad blocker, which just do blocking ad but not usually filters the URLs. Yes, some tech giants have own designed filtering engine but their own and not open for public use. Beside that current system uses multiple engines. In this project there are almost implemented all those features in one space to build up an engine that will provide all the features that multiple systems giving at present and will open it for public use.

- Computer Graphics projects –
(Language/Platform: OpenGL, C++/Windows)
Simple Computer Graphics project which shows the clipping of a line and also show color transparency continuously.
